
Your goal as a parent is to support your child. If they are interested in STEM, they will need your support. The STEM disciplines can be very challenging for most students. Show them that you support their choices in STEM by using the resources below.

**National Science Teacher Association Parent Resource Page**

Science should be fun, not scary—for you and your child! NSTA provides some great guidance on their resource page.

**Family Science**  [http://www.familyscience.org/](http://www.familyscience.org/)

Family Science programs offer opportunities for parents and children to work and learn together. Hands-on activities that use easy-to-find, inexpensive materials let families explore the ways in which science and engineering plays a role in daily life.

**Helping Your Child Learn Science**

This booklet provides parents of children ages 3 through 10 with information, tools and activities they can use in the home and community to help their child develop an interest in the sciences and learn about the world around them.
