STEVE SWOAP

Steven J. Swoap, Ph.D., is a professor of Biology at Williams College. After earning his undergraduate degree from Trinity University, he earned his PhD in Physiology and Biophysics in the lab of Ken Baldwin at University of California Irvine. His post-doctoral training was in Molecular Cardiology in Sandy Williams’ lab at University of Texas Southwestern Medical Center in Dallas. Steve has served as chair of the Biology department, as well as chair of the Biochemistry and Molecular Biology program. Steve has worked at Williams since 1996, and regularly teaches Animal Physiology.

SESSION NAME: Plenary Lecture V
PRESENTATION TITLE: Integrating Research into the Undergraduate Experience
The presentation will include ideas about encouraging undergraduate research projects, starting with first-semester first-year students, through integrative course/lab components, up to senior level independent thesis projects.
