The Connecticut College Department of Biology seeks applications for TWO one-year visiting assistant professor positions for academic year 2018-19 in the areas of marine biology and physiology. Required qualifications: Ph.D. in Biology by July 1, with expertise in physiology or marine biology. The successful candidates will have teaching experience in undergraduate biology and research expertise in either marine biology or physiology.

Teaching assignments for the two positions will include human physiology (with two lab sections), marine ecology (with two lab sections), animal physiology (with one lab section), invertebrate biology (with one lab section) and potentially a seminar in the successful candidate’s area of specialty. Each position will cover two of these four courses, all four of which will be assigned depending on the experience and interests of the two successful candidates.

The teaching load for full-time visitors is three courses per semester; each laboratory section counts as a course. Opportunities for research with undergraduates will be available. We value the contributions visitors bring to our community and encourage their active engagement with their departments and all aspects of campus life during the course of their appointment. Visiting faculty are appointed as participating members of the faculty, but they may become voting members by request. Their presence is welcome at all faculty meetings.

Connecticut College is a private, highly selective institution with a demonstrated commitment to outstanding faculty teaching and research. Recognizing that intellectual vitality and diversity are inseparable, the College has embarked on a significantly successful initiative to diversify its faculty, student body and curriculum. The College seeks creative scholars excited about working in a liberal arts setting, with its strong focus on engaged teaching, participation in shared governance, and active involvement in an institution-wide advancement of diversity. We encourage applications from candidates who share this understanding of the faculty role and will contribute to the diversity of our college community, including members of historically underrepresented groups. AA/EEO

Review of applications will begin March 30, 2018 and will continue until the positions are filled. To apply, submit a cover letter; CV; three recent letters of recommendation; and a statement of teaching philosophy to Interfolio: https://apply.interfolio.com/49510. Questions may be directed to Deborah Eastman, Chair, Department of Biology, Connecticut College, 270 Mohegan Ave., New London, CT, 06320.
