The Penn State Heart and Vascular Institute at the Penn State College of Medicine in Hershey, Pennsylvania seeks a basic science researcher with expertise in MRI and Peripheral Artery Disease (PAD) for a tenured faculty position at the Associate Professor level. The successful candidate will have an independent NIH funded program and a history of collaborative interactions and being able to build a highly productive multidisciplinary research program. The candidate should have training and expertise in data sciences and the capacity to play a major role in the NIH funded Penn State Clinical and Translational Science Institute. Requirements for the position include a doctoral degree and human research experience in MRI, PAD and large datasets, and an academic record of peer-reviewed publications in which they are a primary/senior author, and evidence of participation in relevant academic or professional meetings. Additionally, a background in higher order mathematics and/or informatics will be important. Preference will be given to a track record of extramural funding from federal agencies, commensurate to the stage of a candidate’s professional development. Candidates should submit a letter of application including statement of current and future research experience and interests, curriculum vitae, and names and contact information for three references at https://psu.jobs/job/79715

To review the Annual Security Report which contains information about crime statistics and other safety and security matters and policies, please go to https://police.psu.edu/annual-security-reports, which will also explain how to request a paper copy of the Annual Security Report.
