

Faculty Position in Evidence-Based Medicine, Epidemiology and Biostatistics, American University of Antigua College of Medicine

The American University of Antigua College of Medicine (AUACOM) invites applicants for a full-time position in Public Health, Epidemiology, Biostatistics and Evidence-Based Medicine. The successful candidate will work as part of the Department of Clinical Medicine to design and implement/facilitate curriculum content—primarily, didactic lectures and small group activities—in these disciplines. Other responsibilities may include the facilitation of clinical sessions held by the same department and any other reasonable assignments geared to enhance the efficiency of the department.

This is a full-time faculty position and will require relocation to the Caribbean island of Antigua. Antigua is a well-developed island that offers comfortable living conditions and multiple daily direct flights to the US and Europe. More information regarding the school can be located at www.auamed.org. AUA is one of only 3 Caribbean medical schools that has the necessary accreditations that allow its graduates to obtain licensure throughout the United States and Canada.

Minimum Qualifications:

The candidate must have a Ph.D. or M.D. degree or equivalent. A postgraduate degree in Public Health would be an asset. Preferred qualifications include experience in small group facilitation. Experience teaching in a U.S.-based medical curriculum is desired but not required.

Applicants should submit their curriculum vitae, statement of teaching philosophy, and cover letter to careers@auamed.org.
