Postdoctoral Fellow
LSUHSC-Shreveport - Shreveport, LA, USA

Job Description:
An NIH postdoctoral position to study redox regulation of arteriogenesis is immediately available. The Pattillo lab, in the Department of Physiology, has a major interest in cardiovascular disease and the contribution to disease by the redox state of the vascular cells. Applicants should have a Ph.D. and be a driven individual able to work independently. Applicants should also have a strong record of research productivity and have experience in molecular techniques as well as mouse surgical models. Please send your CV, letter of interest and contact information of at least 2 references.
