

MIIR Postdoctoral Position

A postdoctoral fellow position is available at the Marshall Institute for Interdisciplinary Research (MIIR, <http://www.marshall.edu/miir/>) to study the role of pumping and non-pumping functions of the Na⁺/K⁺-ATPase in liver physiology as well as benign and malignant liver disease. MIIR investigators involved in these lines of research include Drs. Sandrine Pierre, Komal Sodhi, Juan Sanabria, Joseph I. Shapiro, and Zijian Xie. The successful candidate will have the opportunity to work both independently and as part of a multidisciplinary team, with access to all MIIR investigators and their collaborators. MIIR is committed to the career development of its members.

Requirements: Ph.D., M.D., or Pharm.D. Experience in either signal transduction, cell biology/biochemistry/molecular biology, protein structures or drug development is essential. Candidates with experience in live cell imaging and/or animal physiology are especially encouraged to apply. We expect to have the successful candidate involved in translational research.

Salary: commensurate with qualifications and experience.

To apply, please email your CV and a cover letter summarizing your previous research experience along with the contact information of three references to Ms. Hollie Bailey (bailey134@marshall.edu).

Marshall is an equal opportunity/affirmative action employer and strongly encourages applications from women and minority candidates.
