The Department of Orthopaedic Surgery at the University of California, San Diego is seeking a qualified postdoctoral fellow. This post-doctoral fellowship is designed to explore the fundamental concepts of regenerative medicine in Orthopaedic Surgery. Candidates should have a strong background in cell/developmental biology and an interest in Orthopaedics. Experiments will include human and, potentially, preclinical animal experiments, so candidates should be comfortable with standard wet lab techniques and open to translational and clinical lab work. Demonstrated competence with in vitro techniques, next generation sequencing, and bioinformatics are strongly desired.

Candidates should have an MD, MD/PhD, PhD or equivalent degree, competent in developmental biology, interest in orthopaedic surgery a plus.

Salary commensurate with experience, NIH rates.

To apply please send CV, brief statement summarizing your research experience and interest and list three references by email to y1rodriguez@ucsd.edu.

The University of California is an Equal Opportunity/Affirmative Action Employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability, age or protected veteran status.
