RESEARCH POSITION AT SCRIPPS INSTITUTION OF OCEANOGRAPHY, UCSD – BIOLOGY SECTION

The Scripps Institution of Oceanography http://scripps.ucsd.edu at the University of California San Diego invites applications for a full-time Researcher position to be funded largely by extramural research grants and contracts in any of the research areas listed below. The Researcher series at SIO parallels the Professor series in terms of expectations for research and service but carries no teaching requirements. Researchers receive nine-month appointments with 25% salary support from institutional sources. Externally funded research programs are expected to provide the remaining salary support, including an opportunity for summer salary. Researchers at SIO often obtain lecturer appointments in the SIO department, which provides a mechanism to serve as a graduate student advisor.

We seek a motivated, broad-thinking scientist to develop a vigorous research group and provide intellectual leadership in their field while complementing existing expertise in the Biology Section. We are interested in candidates who have demonstrated a commitment to excellence in research as well as service toward building an equitable and diverse scholarly environment. We anticipate hiring at the Assistant Researcher level, but exceptionally well-qualified candidates may be considered for the Associate Researcher or Full Researcher levels.

(1) Marine aquaculture research including micro and macroalgae, shellfish, or finfish and may include the basic biology of aquaculture species with application for enhanced productivity.

(2) Marine “omics” research including applications of genomics, transcriptomics, proteomics and metabolomics to address fundamental questions in ocean biosciences and issues related to human health and the oceans.

The position requires a PhD, or equivalent degree, in a relevant field at the time of application and candidates should have a competitive record of publication, as well as evidence of the ability to conduct and fund an active research program consistent with the appointment level. It is anticipated that successful candidate will have extramural salary support at the time of appointment. Salary will depend on experience and be based on UCSD pay scales.

For full consideration, please apply by the April 1, 2019 deadline at: http://apptkr.com/1395390

SIO is a world-renowned center of marine research with approximately 200 principal investigators leading research programs on all aspects of earth, ocean, biological and atmospheric sciences. We are committed to academic excellence and diversity within the faculty, staff, and student body.

UCSD is an equal opportunity/affirmative action employer with a strong institutional http://diversity.ucsd.edu commitment to excellence and diversity.
