

Lab Manager at USF College of Medicine in Tampa Bay

Dr. Sarah Yuan's lab at University of Florida Morsani College of Medicine seeks an experienced individual to manage a translational research program investigating vascular barrier regulation in health and disease. The research team is composed of 6-10 basic/clinical investigators, postdoctoral fellows, technicians, and students. Annual salary of \$50,000 - \$70,000 depending on qualification and experience.

Responsibilities: Assist the PI in research personnel management; collaborate with investigators in data collection, analysis, presentation, manuscript writing and grant applications; schedule and supervise experiments; trouble shoot technical problems; prepare and implement animal use protocols; coordinate with clinical entities in studies of human tissues or specimens; ensure lab safety and compliance; order supplies and maintain lab inventory and expenditure records.

Qualifications: Doctoral degree in medical or biological science, or master degree in biomedical field with at least 2 years of laboratory experience. Must have strong written and verbal communication skills and must be willing to handle animal/human blood and tissue samples. Knowledge of animal models of human disease or injury and experience in rodent surgery/experimentation are required. Experience with microscopy or molecular/cellular biology techniques is preferred. Interested individuals please send CV and contact info of three references to: syuan@health.usf.edu.
