

Life Sciences

Proceedings of the 14th International Conference on Endothelin

Dear ET-14 Attendees:

As in years past, we are inviting all ET-14 abstract presenters to submit a brief report to be published in a proceedings issue in Life Sciences. This special issue will be a collection of brief reviews and primary research articles on every aspect of endothelin research presented at the conference. On behalf of the Guest Editors, it is our pleasure to formally invite you to write a contribution to this issue. We would also entertain ideas for brief reviews.

We recommend a length of no more than 4 typeset pages, including figures and tables, with one typeset page corresponding to approximately 4 manuscript pages (please use 1500-3000 words as a guideline). All submissions must follow the guidelines for authors published at the journal website: http://www.elsevier.com/wps/find/journaldescription.cws_home/525477/description). All manuscripts must be submitted online through the Elsevier Editorial System (EES) at <http://ees.elsevier.com/lfs>). On this page, authors can register and upload all components of their article. The editorial policy of the journal is located on the webpage and will be strictly adhered to by all reviewers of this special issue. All submitted papers will be sent for peer-review with comments obtained from at least two reviews from experts in the designated field. There is assumption of acceptability. Editors will consider that brief reports will not have as much data as a regular manuscript. Any questions can be directed to Elsevier Customer Support (<http://support.elsevier.com>). Authors should refer to the proceedings issue on the 14th International Conference on Endothelin (ET-14) when contacting Elsevier. There will be no submission or page charges to the authors as the cost of the proceedings have been covered through the generosity of the American Physiological Society and Elsevier, the journal's publisher (however, color charges will not be waived). Each corresponding author will be provided with a complementary copy of the Proceedings issue. Additional copies will be available for purchase. The deadline for submission of all article types is October 1, 2015 for publication in spring 2016.

Respectfully,

Adviye Ergul, Anil Gulati, and David Pollock

Guest Editors
