APS Annual Meeting

APS holds an annual meeting at Experimental Biology, in conjunction with other members of the Federation of the American Societies for Experimental Biology. The meeting attracts over 13,000 scientists and exhibitors, with physiologists contributing about one-third of the total abstracts submitted. APS sponsors and organizes over 100 lectures and symposia, involving over 400 speakers.

Sponsorship Levels and Benefits

Partner (\$25,000)

- Includes benefits at Sponsor level
- Corporate logo on all advertisements (electronic and print) for APS annual meeting at EB
- Corporate logo in APS EB program book, includes front cover and exclusive back cover recognition
- Corporate logo on a top level ad position in EB Highlights Special Edition e-newsletter and main APS EB signage, where possible
- Oral recognition at APS opening and closing lectures

Sponsor (\$10,000)

- Includes benefits at Supporter level
- Corporate logo in sponsor recognition section of APS EB program book, EB Highlights Special Edition e-newsletter, and in November, January, and March issues of APS' newsletter, *The Physiologist*
- List of registrants (APS only) with postal mail contact information

Supporter (\$5,000)

- Includes benefits at Friend level plus
- Listed in EB Highlights Special Edition e-newsletter, and in November, January, and March issues of APS' newsletter, *The Physiologist*
- Listed on slide loops in APS session room(s)

Friend (\$2,500)

- Listed in sponsor recognition section of APS EB program book
- Corporate logo on conference/session web page with link to company homepage

Exhibits

Visit experimentalbiology.org for more information on EB exhibit opportunities

APS Specialty Conferences

Each year, APS also holds multiple specialty conferences, which are leading venues for sharing exciting, new research discoveries and developing collaborations. These specialty conferences provide attendees with intimate access to other scientists within and across fields in physiology and biomedical science, fostering discussions and collaborations that greatly advance scientific discovery. Attendance at APS specialty conferences typically ranges from 100-400 individuals.

Sponsorship Levels and Benefits

Partner (\$25,000)

- Includes all benefits at the Sponsor level plus
- Recognition as primary sponsor, includes corporate logo on front of program book and all meeting signage, recognition on all meeting promotional pieces, one free exhibit booth/table, and one complimentary registration

Sponsor (\$10,000)

- Includes benefits at Supporter level plus
- Display of two pieces on literature table
- Two material inserts in attendee bags
- Corporate logo in sponsor recognition section of meeting program book
- Corporate logo on meeting notepad, lanyard, and bags (if provided)
- One-time use of registration list

Supporter (\$5,000)

- Includes benefits at Friend level plus
- Corporate logo on meeting notepad

Friend (\$2,500)

- Includes benefits at Contributor level plus
- Display of one piece on literature table
- One material insert in attendee bags

Contributor (<\$2,500)

- Listing in sponsor recognition section of meeting program book
- Corporate logo on slide loop presentation between meeting sessions
- Corporate logo on meeting web page with link to company homepage

Exhibits

Exhibit Table (\$1,500, if available)

- One six foot skirted table with seating

About APS

The American Physiological Society (APS) is a 501(c)3 nonprofit organization that has been devoted to fostering physiological research since 1887. Since its founding by five notable scientists, the Society's membership has grown to ~11,000, with the majority of members holding doctoral degrees in physiology or medicine (or another health profession).

The Society's mission is to advance scientific discovery, understand life, and improve health. In pursuit of this mission, APS convenes conferences and workshops, publishes 15 scientific journals, pursues sensible policies for research funding and regulation, and provides educational programs to encourage and support the careers of young scientists, particularly those underrepresented in science.
