Physiology Understanding Week

November 6-10, 2017

www.PhUnWeek.org

GOALS of the American Physiological Society's annual Physiology Understanding (PhUn) Week:

- ✓ Increase student interest in and understanding of physiology in their lives
- ✓ Increase teacher recognition of physiology in their standards-based science curriculum
- ✓ Introduce students to physiology as a possible career
- ✓ Involve more physiologists in outreach to the students and teachers in their communities

The **theme** for PhUn Week is the physiology of **Exercise & Health**. Biomedical researchers and members of their laboratory partner with a local area teacher to adapt and customize instructional materials for a classroom visit or school assembly program.

The team engages students in relevant learning experiences through interactive, hands-on physiology activities. Through this real-life, face-to-face encounter with scientists, students learn about how their bodies function and how medical discoveries are made.

The American Physiological Society is a professional scientific membership organization devoted to fostering scientific research, education, and the dissemination of scientific information. The APS supports a variety of educational activities including programs and fellowships to encourage the development of young scientists and science educators, with a particular focus on women and underrepresented minorities.
