David S. Bruce

David S. Bruce (1939 - 2000) served as Chair of the APS Teaching Section and as a professor of physiology at Wheaton College from 1978-2000. Dr. Bruce was a dedicated physiology educator who played active roles in both the APS and the Society for Integrative & Comparative Biology. As an undergraduate educator at Wheaton College, Dr. Bruce had a particular interest in engaging undergraduate students in scientific research. Dr. Bruce not only encouraged and supported his students in participating in research, but he also regularly brought undergraduate students to the Experimental Biology meeting, often to present their research findings. In 2000, Dr. Bruce died at the age of 61 of complications following a kidney transplant. This award honors Dr. Bruce's commitment to promoting undergraduate involvement in research, in the APS annual meeting, and, ultimately, in research careers.

APS Congratulates the 2006 Bruce Award Finalists

Manasi Bhate, Oberlin College/Vanderbilt University
Carol W.Y. Chan, University of Calgary
Jennifer M. Edwards, Michigan State University
Adrian A. Feijoo, Univ. of Maryland, Baltimore/Tripler Army Med. Ctr.
Jon C. Gonzales, Colorado State University
David G. Ingram, University of Missouri
Mary E. McCarty, Tulane University
Robert A. Overton, Jr., University of North Carolina at Charlotte
Kate E.R. Russell, Bates College
Julia C. Simons, Bates College
Marissa L. Smith, Radford University
Gillian L. Sowden, Williams College

2006 Undergraduate Presenters

AbdulRahman, Alya’a A.
University of Qatar
Carbohydrate metabolism during period of different diet types

Arant, Ryan J.
University of California, Davis
Age dependent neuroplasticity in the hamster hippocampus

Arteaga, Christophe
Barry University
Stromal derived factor (SDF)-1 alpha expression in glioma cells & human brain microvascular endothelial cells

Atkins, Scott Aaron
Pepperdine University
Potassium channel regulation of vasomotor responses in rat soleus feed arteries after short-term exercise training

Babcock, Lindy
Hope College
ICV galanin-like peptide increases metabolic rate in male rats

Barrick, Stacey Renee
University of Pittsburgh
Urothelial cell activation leads to afferent excitability: Effects of botulinum toxin A

Benavidez, Kimberly Marie
New Mexico State University
Effects of extreme hemorrhage in hypoxically preconditioned pigeons, Columba livia

Bhate, Manasi
Oberlin College/Vanderbilt University
GCK-3 induced phosphorylation alters ClC anion channel outer pore structure

Bonner, Angelina
Bradley University
Influence of pyrene on mitochondrial oxygen consumption and membrane potential in frogs

Bryant, Jessica M.
University of New Mexico Health Sciences Center
Role of gap junctions and K+ channels in endothelium-derived hyperpolarizing factor-mediated vasodilation following chronic hypoxia

Cardinale, Jeffrey P.
Louisiana State Univ. Sch. Veterinary Medicine
Regulation of the equine IL-8 gene in normal horses compared to horses acutely affected by laminitis

Dudowicz, Kara A.
Trinity University
Modulation of epithelial barrier function by tumor necrosis factor-α and interferon-γ in Madin-Darby canine kidney cells is mediated through mitogen activated protein kinase signaling

Cassady, Bridget A.
Winona State University
Effect of polyunsaturated and saturated fat intake as part of a low-carbohydrate diet for weight loss

Chan, Carol W.Y.
University of Calgary
Insulin resistance induced elevations in cardiac glycogen are not attenuated by regular exercise

Cress, Karen E.
Colorado State University
The hunger switch

da Silva, Liana Gouveia
UNIFESP-EPM
Inhibition of the neuronal nitric oxide synthase (nNOS) reduces cardiovascular responses elicited by acetylcholine (Ach) microinjection within the nucleus of the solitary tract (NTS) of conscious rats

Davis, Vernita J.
California State University Northridge
Neuroprotective effects of 17-β-estradiol in the spastic Han Wistar rats

Dawkins, Marshall
West Texas A&M University
Evaluation of validity for novel biomedical instrument measuring fatigue, sleep deprivation and performance capacity

Diedrich, Collin R.
Bradley University
Volume changes in hippocampal neurons following cocaine/hypoxic exposure

Dillard, Melissa
West Texas A&M University
Evaluation of reliability of monofilaments to determine peripheral sensitivity and neuropathy

Douglas, Stephen
Los Angeles Biomedical Research Institute at Harbor-UCLA Medical Center
Rho Kinase Modulates Platelet Activating Factor (PAF) Binding to Membrane Receptors in Pulmonary Vascular Smooth Muscle Cells (PVSMC)

Dudowicz, Kara A.
Trinity University
Modulation of epithelial barrier function by tumor necrosis factor-α and interferon-γ in Madin-Darby canine kidney cells is mediated through mitogen activated protein kinase signaling

</table>
2006 Undergraduate Presenters

Piersol, Megan Christine
University of North Florida
Absorption of TEA+ by intestine of the American lobster, Homarus americanus

Pittman, Bryan Hosken
Radford University
Central amylin decreases appetite and total food transit rate in 4-day post hatch chicks

Primo, P.
University of Porto
Urinary 8-hydroxydeoxy-2'-guanosine evaluation in a paediatric Portuguese population with Down Syndrome

Ramalingam, Nirmala
Rutgers University
Single-cell electrophysiology in macaque inferior parietal lobule during visually guided reach

Rodden, William H.
Saint Louis University
Ca2+-evoked transmitter release is inhibited in PC12 cells that have synaptotagmin I silenced by RNAi

Rosenbaum, Kaylee M.
Bradley University
Rodent brain neurotrophic factors are altered by cocaine/hypoxic exposure

Rullo, Jacob
McMaster University
The role of liver CD1-restricted NK T cells in a model of recurrent colitis

Saadat, Siavash
Georgetown University
Sympathetic neuronal-megakaryocyte axis: a key to stress-induced amplification of atherosclerotic-like lesions

Sabir, Sadiah
University of California, Davis
Seasonal cues & hibernation alter expression of uncoupling proteins in the golden hamster

Schaffer, Bethany E.
College of William and Mary
Functional identification of thermally classified neurons in the preoptic and anterior hypothalamus

Shawki, Ali
University of Cincinnati College of Medicine
Molecular impact of human divalent metal-ion transporter DMT1 mutations associated with disease phenotypes

Silva, Haroldo Souza
Florida International University
A mathematical model of plasma membrane electrophysiology and calcium dynamics in rat mesenteric endothelial cells

Simons, Julia C.
Bates College
Hypoxic ventilatory response of rats after intermittent hypercapnic hypoxemia and intermittent hypoxia

Smith, Marissa L.
Radford University
Central alpha-melanocyte stimulating hormone induces increased locomotion and decreased sleep and pecking in Gallus gallus

Showden, Gillian Louise
Williams College
Peripheral oxyntomodulin increases heart rate in mice, independent of insulin and catecholamines

Taruno, Akiyuki
Kyoto Prefectural University of Medicine
Receptor tyrosine kinases-mediated mechanism in hypotonicity-provoked Na+ reabsorption in renal epithelial A6 cells

Tehel, Michelle M.
University of Kansas
Lack of association of a 5-HT1B promoter polymorphism with body mass index

Tobaldini, Eleonora
University of Milan
Assessment of blood pressure variability by means of spectral and symbolic analysis in normal and congestive heart failure rats

Tomicek, Nanette J.
Westminster College
Effects of amphotericin B on gill water permeability

Tormos, Kathryn
Benedictine University
Cyr61 is upregulated in pre-osteoclastic cells by low-level cadmium exposure

van den Berg, Irene P.
University of California, San Diego
Effect of acetazolamide on pulmonary and muscle gas exchange during hypoxic exercise

Vogler, Sabine
University of California, San Diego
WISE-2005: The relation between standing balance and orthostatic tolerance in women

Winikor, Jared
University of Florida
The ontogeny of steroid sulfatase expression in the ovine fetal brain

Wolff, H.
University of Southern Denmark
Renal nerves and nNOS: Roles in natriuresis of acute sodium loading

Woodman, Ryan
Naval Medical Center, San Diego
Chlothaldone inhibits angiotensin-induced apoptosis in vascular smooth muscle

Wyatt, Erin A.
University of Kentucky
Expression of hypertension during development of an Okamoto SHR/Brown Norway congenic rat strain

Zaidan, Noora
University of Qatar
Effect of a high carbohydrate and a high protein diets on liver function

Zhen, Janet
University of California San Diego
Depletion of the DNA repair enzyme, Ogg1, increases rat pulmonary endothelial cell (PAEC) vulnerability to xanthine oxidase (XO)-induced cytotoxicity

The American Physiological Society
2006-2007 Council
Douglas C. Eaton, President
D. Neil Granger, Past President
Dale J. Benos, President-Elect
