

## 2017 SUBSCRIPTION RATES

### Institution

For subscription information, please visit:  
[the-aps.org/publications/subs](http://the-aps.org/publications/subs)

### Individual

Online Only \$585

### Member

Online Only Free

## ORDER INFORMATION

Order Form and More Information  
can be found at [www.physiology.org](http://www.physiology.org)

### Frequency:

Published online as articles are ready and  
archived as monthly issues.

Printed monthly in the consolidated version of *AJP*.

Two volumes per year.

eISSN: 1522-1563

## CONTACT

### Customer Service:

American Physiological Society  
9650 Rockville Pike  
Bethesda, MD 20814-3991 (USA)

Submit your manuscript today!

<http://ajpcell.msubmit.net>

*What submitting authors are saying about APS's review process...*

*Your review process is one of the fastest!*

*You have the best reviewers—very constructive feedback I could use!*

## APSselect

Monthly collection of the "best of the best"  
original research articles from the APS journals  
[apsselect.physiology.org](http://apsselect.physiology.org)

### Why submit to *AJP-Cell Physiology*?

- ✓ Internationally renowned Journal with world-class editorial oversight
- ✓ NO author submission fees!
- ✓ Rapid review; mean time for initial decision is ~16 days
- ✓ No page or figure limits
- ✓ Publication by the prestigious American Physiological Society
- ✓ Articles listed in PubMed within ~2 weeks of acceptance. All articles made freely available 12 months post-publication
- ✓ Articles delivered to PubMed Central by the APS on behalf of authors
- ✓ Engagement of the global readership through table of contents distribution, personalized email alerts, cross referencing, and search engine optimization

A journal of the  
American  
**Physiological  
Society**

# AJP-Cell Physiology—a leading source of original research in cell physiology

## Editorship

### Editor-in-Chief: Josephine C. Adams, Ph.D.

Josephine C. Adams received her Ph.D. from the University of London, UK, and postdoctoral training in cancer cell biology and vascular cell biology from Imperial Cancer Research Fund (now the London Research Institute of CR-UK) and Harvard University, respectively. She is currently Professor of Cell Biology at University of Bristol, UK.

**Journal Home Page:** [ajpcell.org](http://ajpcell.org)

**Editor's Email:** [jo.adams@bristol.ac.uk](mailto:jo.adams@bristol.ac.uk);  
[ajpcell-office@bristol.ac.uk](mailto:ajpcell-office@bristol.ac.uk)

### Deputy Editor

**Jason X.-J. Yuan**, University of Arizona Department of Medicine

### Associate Editors

**Sue Bodine**, University of California, Davis

**Eric Delpire**, Vanderbilt University School of Medicine

**Kirk Hamilton**, University of Otago, Dunedin, New Zealand

**Sophie Lotersztajn**, Inserm UMR 1149/Université Paris Diderot

**Sanjay W. Pimplikar**, Cleveland Clinic Lerner Research Institute

## Scope of the Journal

The *American Journal of Physiology-Cell Physiology* is dedicated to innovative approaches to the study of cell and molecular physiology. Contributions that use cellular and molecular approaches to shed light on mechanisms of physiological control at higher levels of organization also appear regularly. Manuscripts dealing with the structure and function of cell membranes, contractile systems, cellular organelles, and membrane channels, transporters, and pumps are encouraged. Studies dealing with integrated regulation of cellular function, including mechanisms of signal transduction, development, gene expression, cell-to-cell interactions, and the cell physiology of pathophysiological states, are also eagerly sought. Interdisciplinary studies that apply the approaches of biochemistry, biophysics, molecular biology, morphology, and immunology to the determination of new principles in cell physiology are especially welcome.

## Important Information for READERS, AUTHORS, and LIBRARIANS

- **AuthorChoice** Authors can choose to pay a fee to have their articles publicly available upon publication.  
Cost of Publication: [the-aps.org/PublicationCost](http://the-aps.org/PublicationCost)  
*AuthorChoice*: [the-aps.org/AuthorChoice](http://the-aps.org/AuthorChoice)
- **CiteTrack**: Email alerts are sent when new content matches criteria based on the topics, authors, and articles you want to track.
- **CrossRef**: APS participates in CrossRef initiative, which links to over 5,600 journals worldwide.
- **eTOCs**: Free email notification is sent of new tables of contents as they become available.
- **Google search engine**: All online content is searchable through the Google search engine.
- **Index Medicus, BIOSIS Previews, and TRSI Web of Science** index APS journals. APS journal content is indexed on MEDLINE and is accessible through PubMed.
- **Legacy Content** is an online package of over 100 years of historical scientific research from 13 APS research journals.
- **LOCKSS and CLOCKSS**: Perpetual electronic archiving in LOCKSS and CLOCKSS preserves the content of all APS journals.
- Manuscripts are published online within days of acceptance.
- **RSS Feeds**: is a mechanism to subscribe to "headlines" from a website.

## Special Calls for Papers

**Cell and Molecular Physiology of the Blood-Brain Barrier and Choroid Plexus**  
Deadline: June 30, 2017

**Cellular Pathophysiology of Neurodegenerative Diseases**  
Deadline: June 30, 2017

**Gasotransmitters**  
Deadline: June 30, 2017

For more information, visit <http://bit.ly/AJPCellCalls>. All manuscripts should be submitted online via eJournal Press at [ajpcell.msubmit.net](http://ajpcell.msubmit.net).

**Molecular Pathways in Cell Signaling**  
Deadline: June 30, 2017

**Single Cell Physiology**  
Deadline: June 30, 2017

**Stem Cell Niche and Differentiation**  
Deadline: June 30, 2017

## Article Types

**VIEWPOINT**: Viewpoint articles present an insightful, thoroughly documented slant on a topic for which opinions are either controversial or undecided in the literature. Viewpoints must be authored by authors with demonstrated expertise in the field under discussion.

**RAPID REPORTS**: Short papers presenting important new findings that could potentially have a major impact on the field.

**RESEARCH ARTICLES**: Important new research results including the entire contents of a research project. Research articles include an abstract, an introduction, methods and results sections, a discussion, and relevant citations. Large data sets are welcome for inclusion in the online publication. Articles are peer reviewed.

**REVIEW ARTICLES**: Synthesis of state-of-the-art knowledge in a defined area highlighting new questions and pointing to future research directions. They encompass examination of biological processes, systems, and models, and technologies for their study. Typically, reviews are invited and all are peer reviewed.

**THEMES**: Articles on specific topics, which are reviews covering scientific areas of new discoveries, rapid progress, and exciting new opportunities in cell physiology. Such articles can be opinionated highlights of what is new, exciting, and perhaps controversial, in the field and which, in addition, will help educate readers unfamiliar with the area.

**PERSPECTIVES**: Short articles that disseminate new and original lines of thinking in physiology.

**METHODS IN CELL PHYSIOLOGY**: Manuscripts submitted under this category should describe new methods for the recording, collection, and/or analysis of data relevant to understanding how the physiological system works.

**EDITORIALS**: Provide commentary by the Editor and Associate Editors on issues related to the Journal's mission as well as of general interest to our readers.

**EDITORIAL FOCUS ARTICLES**: Commentaries invited by the Editors on articles of unusual interest that are published in the journal. Editorial Focus articles are designed to place the findings and conclusions of the highlighted article in context with the current state-of-the-art, to note strengths and (if relevant) weaknesses of the study, and to identify key questions that remain to be addressed.

**LETTERS TO THE EDITOR**: Short letters reviewed by the appropriate Editor and subject to editing and possible abridgment. They do not include original, unpublished data. They also address matters of general interest to the readership.

## Featured Articles and Collections

### Editor's Selected Articles

View these featured articles for FREE at [ajpcell.org](http://ajpcell.org). Editor's selected articles are free for a limited time (and replaced) so be sure to check out the website regularly.

### Article Collections

APS has developed a variety of collections for the convenience of the readers. Many collections are the result of special selections by the Editor or by a select committee, and as such offer a highly focused view of a particular discipline or specialty. To view the Collections for *AJP-Cell Physiology*, please visit [ajpcell.org/collection](http://ajpcell.org/collection).
