ORDER INFORMATION

Order form and more information can be found at www.physiology.org

Frequency:
Published online as articles are ready and archived as monthly issues. Printed monthly in the consolidated version of AJP.

Two volumes per year.
eISSN: 1522-1563

What submitting authors are saying about APS’s review process...
“Your review process is one of the fastest!”
“You have the best reviewers—very constructive feedback I could use!”

Additional Submission Benefits Include

- No page or figure limits
- Publication by the prestigious American Physiological Society
- Website offers a simplified, clean look, allowing for easy navigation
- World-class editorial oversight with easy online submission and rapid review
- Delivery to PubMed Central of NIH-funded articles by APS on behalf of authors
- Increased visibility via Editorial Focus articles that highlight published articles
- All articles made freely available 12 months post-publication
- Broad readership via global access, personalized email alerts, cross referencing, and search engine optimization

NEW WEBSITE COMING SOON
**Editorship**

**Editor-in-Chief: André Marette, PhD**

Dr. André Marette is Professor of Medicine at the Heart and Lung Institute, Laval Hospital, and Scientific Director of the Institute of Nutrition and Functional Foods at Laval University.

Journal Home Page: [ajpendo.org](http://ajpendo.org)

Editor’s Email: andre.marette@criucpq.ulaval.ca

**Deputy Editor**

Gary Schwartz, Albert Einstein College of Medicine and Neuroscience

**Associate Editors**

Patrice Cani, Universite Catholique de Louvain

Hari Hundal, University of Dundee

Anna Krook, Karolinska Institutet

Patrick Edward MacDonald, University of Alberta

Gary Schwartz, Albert Einstein College of Medicine

Rebecca Simmons, University of Pennsylvania

Cynthia Smas, University of Toledo

Matthew Watt, Monash University

**Scope of the Journal**

The American Journal of Physiology—Endocrinology and Metabolism publishes original, mechanistic studies on the physiology of endocrine and metabolic systems. Molecular, subcellular, and cellular studies in whole animals or humans will be considered. Specific themes include, but are not limited to, mechanisms of hormone and growth factor action; regulation of metabolism and energy balance; integrative organ cross talk; paracrine and autocrine control of endocrine cell performance; function and activation of hormone receptors; endocrine or metabolic control of channels, transporters and membrane function; differentiation of endocrine and reproductive cell function; temporal analysis of hormone secretion and metabolism; and mathematical/kinetic modeling and analysis of hormone action or metabolism. Novel molecular, immunological, or biophysical studies of hormone action are also welcome.

---

**Calls for Papers**

- **Browning and Beiging of Adipose Tissue, Its Role in the Regulation of Energy Homeostasis and as a Potential Target for Alleviating Metabolic Diseases**
  - Deadline: September 30, 2017
- **Endocannabinoids and Cannabinoid Receptors as Regulators of Endocrine Functions and Tissue Metabolism**
  - Deadline: September 30, 2017
- **Mechanisms of Effects on Sleep Disruption on Adipocytokine/Obesity Metabolism and Their Relation to Other Metabolic Disease**
  - Deadline: September 30, 2017
- **Metabolism and Signaling Functions of Amino Acids in the Regulation of Cell/Tissue Function in Health and Disease**
  - Deadline: September 30, 2017
- **Mitochondria Dysfunction in Aging and Metabolic Diseases**
  - Deadline: September 30, 2017

---

**Article Types**

**RESEARCH ARTICLES:** Important new research results including the entire contents of a research project. Research articles include an abstract, an introduction, methods and results sections, a discussion, and relevant citations. Large data sets are welcome for inclusion in the online publication. Articles are peer reviewed.

**PERSPECTIVES:** Short articles that disseminate new and original lines of thinking in physiology.

**FRONTIERS:** A Frontiers article is a type of Perspective. The Frontiers series aims to provide a concise, cutting-edge analysis of a field or a research question.

**INNOVATIVE METHODOLOGY:** Manuscripts submitted under this category should describe new methods for the recording, collection, and/or analysis of data relevant to understanding how the physiological system works.

**REVIEW ARTICLES:** Synthesis of state-of-the-art knowledge in a defined area highlighting new questions and pointing to future research directions. They encompass examination of biological processes, systems, and models, and technologies for their study. Typically, reviews are invited and all are peer reviewed.

**EDITORIALS:** Provide commentary by the Editor, Associate Editors, and other scientists and experts on issues related to the Journal’s mission as well as of general interest to our readers. Acceptance will reside with the Editors.

**EDITORIAL FOCUS ARTICLES:** Commentaries on papers of unusual interest published in the journal that were chosen by the Editor to be highlighted by a brief Editorial Focus commentary.

**LETTERS TO THE EDITOR:** Short letters reviewed by the appropriate Editor and subject to editing and possible abridgment. They do not include original, unpublished data. They also address matters of general interest to the readership.
