Submit your manuscript today! http://jn.msubmit.net

What submitting authors are saying about APS’s review process:
“Your review process is one of the fastest!”
“You have the best reviewers—very constructive feedback I could use!”

Additional Submission Benefits Include:
✓ No page or figure limits
✓ Publication by the prestigious American Physiological Society
✓ Website offers a simplified, clean look, allowing for easy navigation
✓ World-class editorial oversight with easy online submission and rapid review
✓ Delivery to PubMed Central of NIH-funded articles by APS on behalf of authors
✓ All articles made freely available 12 months post-publication
✓ Broad readership via global access, personalized alerts, cross referencing, and search engine optimization

Calls for Papers

Working Memory: Neural Mechanisms
Deadline: December 31, 2017

50 Years of Microneurography: Insights into Neural Mechanisms in Humans
Deadline: December 31, 2017

Control of Coordinated Movements
Deadline: December 31, 2017

Neuroscience at IUPS 2017
Deadline: July 1, 2018

Progress in Motor Control
Deadline: July 1, 2018

The Role of Eye Movements in Vision, Cognition and Action
Deadline: July 1, 2018

Please visit http://bit.ly/JNSpecialCalls for more information. All manuscripts should be submitted online via eJournal Press at jn.msubmit.net.

Featured Podcasts

Listen at ineurophysiol.podbean.com

Fitness and the cortical response to autonomic challenge
Katelyn Wood (University of Western Ontario) talks about some of the surprising findings in a study exploring the relationship between cardiorespiratory fitness and forebrain circuitry associated with cardiovascular control.
Associated article: https://doi.org/10.1152/jn.00592.2016

Voltage-gated sodium channel expression in muscle spindles
Tim Cope and Dario Carrasco (Georgia Institute of Technology) talk about their work looking at the distribution of voltage-gated sodium channels in primary sensory endings of mammalian muscle spindles.
Associated article: https://doi.org/10.1152/jn.00889.2016

Can we hear affect our sense of touch?
Jeff Yau (Baylor College of Medicine) discusses his recent work on auditory adaptation and tactile frequency perception.
Associated article: https://doi.org/10.1152/jn.00783.2016
The Journal of Neurophysiology publishes original articles on the function of the nervous system. All levels of function are included, from the membrane and cell to systems and behavior. Experimental approaches include molecular neurobiology, cell culture and slice preparations, membrane physiology, developmental neurobiology, functional neuroanatomy, neurochemistry, neuropharmacology, systems electrophysiology, imaging and mapping techniques, and behavioral analysis. Experimental preparations may be invertebrate or vertebrate species, including humans. Theoretical studies are acceptable if they are tied closely to the interpretation of experimental data and elucidate principles of broad interest.

**Important Information for READERS, AUTHORS, and LIBRARIANS**

- **AuthorChoice**: Authors can choose to pay a fee to have their articles publicly available upon publication. Cost of Publication: [the-aps.org/PublicationCost](http://the-aps.org/PublicationCost) AuthorChoice: [the-aps.org/AuthorChoice](http://the-aps.org/AuthorChoice)
- **CiteTrack**: Receive email alerts when new content matches criteria based on the topics, authors, and articles you want to track.
- **CrossRef**: APS participates in CrossRef initiative, which links to over 5,600 journals worldwide.
- **eTOCs**: Free email notification of new tables of contents as they become available.
- **Google**: All online content searchable through the Google search engine.
- **Index Medicus, BIOSIS Previews, and TRSI Web of Science**: index APS journals. APS journal content indexed on MEDLINE and accessible through PubMed.
- **Legacy Content**: Online package of over 100 years of historical scientific research from 13 APS research journals.
- **LOCKSS and CLOCKSS**: Perpetual electronic archiving in LOCKSS and CLOCKSS preserves the content of all APS journals.
- **Manuscripts published online within days of acceptance.**
- **RSS Feeds**: A mechanism to subscribe to “headlines” from a website.

**New! Case Studies in Neuroscience**: Original research articles that describe human or animal studies that cannot be replicated experimentally, but provide unique insights into mechanisms of cellular or systems level neural function.

**Rapid Reports**: Short papers presenting important new findings that could potentially have a major impact on the field.

**Neuro Forum**: A place for brief reviews of recent, single-target articles and mini-reviews of current and significant developments in neurophysiology. Articles are authored by current students or postdoctoral fellows (faculty excluded).

**Research Articles**: Important new research results including the entire contents of a research project. Research articles include an abstract, an introduction, methods and results sections, a discussion, relevant citations, tables, and figures. Large data sets are welcome for inclusion in the online publication. Articles are peer reviewed.

**Innovative Methodology**: Manuscripts submitted under this category should describe new methods for the recording, collection, and/or analysis of data relevant to understanding how the physiological system works.

**Review Articles**: Synthesis of state-of-the-art knowledge in a defined area highlighting new questions and pointing to future research directions. They encompass examination of biological processes, systems, and models and technologies for their study. Typically, reviews are invited, and all are peer reviewed.

**Editorials**: Provide commentary by the Editor, Associate Editors, and other scientists and experts on issues related to the Journal’s mission as well as of general interest to our readers. Acceptance will reside with the editors.

**Letters to the Editor**: Short letters reviewed by the appropriate Editor and subject to editing and possible abridgment. They do not include original, unpublished data. They also address matters of general interest to the readership.

**Featured Articles**

All accepted Rapid Reports and manuscripts submitted for Calls for Manuscripts are available free for a period, soon after acceptance, at [jn.org](http://jn.org).

**Check out FREE Editor’s Selected Articles at [jn.org](http://jn.org)**
