Scope of Journal

Physiology publishes invited review articles written by leaders in their fields. These articles are peer reviewed and highlight major advances in the broadly defined field of physiology. The journal also publishes shorter articles that either present important emerging topics and technologies or differing points of view. Finally, the journal highlights and briefly summarizes some of the most exciting new papers in physiology. With a new format that is both exciting and attractive, the journal is a valuable tool for researchers, educators, and students.
