JOURNALS OF THE AMERICAN PHYSIOLOGICAL SOCIETY

www.physiology.org

American Journal of Physiology (AJP) consolidated—www.physiology.org

The consolidated *American Journal of Physiology (AJP)* ranks as one of the most frequently cited publications among all physiology journals listed in the Journal Citation Index. Published in two monthly volumes by the American Physiological Society, the consolidated *AJP* brings you approximately 1,800 articles encompassing 17,800 pages annually. The consolidated edition of the *AJP* comprises the below seven highly regarded journals of the American Physiological Society.

AJP-Cell Physiology

AJP-Endocrinology and Metabolism

AJP-Gastrointestinal and Liver Physiology

AJP-Heart and Circulatory Physiology

AJP-Lung Cellular and Molecular Physiology

AJP-Regulatory, Integrative and Comparative Physiology

AJP-Renal Physiology

For more information, please visit www.physiology.org

Journal of Neurophysiology—jn.org

The *Journal of Neurophysiology* publishes original articles on the function of the nervous system. All levels of function are included, from the membrane and cell to systems and behavior. Experimental approaches include molecular neurobiology, cell culture and slice preparations, membrane physiology, developmental neurobiology, functional neuroanatomy, neurochemistry, neuropharmacology, systems electrophysiology, imaging and mapping techniques, and behavioral analysis. Experimental preparations may be invertebrate or vertebrate species, including humans. Theoretical studies are acceptable if they are tied closely to the interpretation of experimental data and elucidate principles of broad interest.

Journal of Applied Physiology—jappphysiology.org

The *Journal of Applied Physiology* publishes original papers that deal with diverse areas of research in applied physiology, especially those papers emphasizing adaptive and integrative mechanisms. Adaptive physiology includes 1) inherent adaptations such as those related to development, aging, and pathophysiological conditions and 2) adaptations to the external environment such as those occurring with exercise, microgravity, hypoxia, hypo- and hyperbaria, and hypo- and hyperthermic conditions. Integrative physiology includes 1) horizontal integration across organ systems and 2) vertical integration from molecule to cell to organ. In all areas of applied physiology, the use of cutting-edge techniques including molecular and cellular biology is strongly encouraged.

Physiological Reviews—prv.org

Physiological Reviews provides state-of-the-art coverage of timely issues in the physiological and biomedical sciences. It appeals to physiologists, neuroscientists, cell biologists, biophysicists, and clinicians with special interest in pathophysiology. Topics are covered in a broad and comprehensive manner. These articles are very useful in teaching and research as they provide interesting, clearly written updates on important new developments.

Physiological Genomics—physiolgenomics.org

Physiological Genomics publishes the results of a wide variety of experimental and computational studies from human and model systems to link genes and pathways to physiological functions. The journal encourages the submission of research utilizing genomics, epigenomics, proteomics, metabolomics, and other systems approaches together with novel technologies linking genes to the function of complex biological pathways.

Physiology—physiologyonline.org

Physiology publishes invited review articles written by leaders in their fields. These articles are peer reviewed and highlight major advances in the broadly defined field of physiology. The journal also publishes shorter articles that either present important emerging topics and technologies or differing points of view. Finally, the journal highlights and briefly summarizes some of the most exciting new papers in physiology. With a new format that is both exciting and attractive, the journal is a valuable tool for researchers, educators, and students.

APS Journals Digital Library

The Journals Digital Library of the American Physiological Society is a single package of the Society's 10 peer-reviewed original research and 2 review journals. This package is offered at a significant discount off the individual title rates.

APS Journal Legacy Content—ajplegacy.physiology.org

The APS Journal Legacy Content is available online only and can be purchased separately at a one-time charge. It is a separate program from the Subscription Program in that you pay once for the perpetual access to the online content from all APS journals from 1898 to 1996-1998, depending on the journal. The content goes back to the first issue of each of the APS journals-including APS's first journal in 1898, the *American Journal of Physiology*.

Tier Definitions

Tier	Category	Description
1	Academic	High school or pre-collegiate academy, single location, not school district level
	Medical	Health care provider, private practice or clinic
	Government or Non-profit	Public library, museum or archive, non-profit single office non-research government organization
2	Academic	Two or four-year college, community college or technical college without graduate program
	Medical	Community level hospital or outpatient clinic (non-teaching or research)
	Government or Non-profit	Charitable organization, professional society, independent research library, local or municipal government office
3	Academic	University and research programs offering Master and Doctorate programs
	Medical	Teaching or research hospital
	Government or Non-profit	Local government agency or ministry, private or non-profit research institute
4 Contact Publisher	Corporate	Small, single-site organization
	Academic	Large university system, multi-campus, centrally administered academic institution (not a consortium or shared digital library, but a single organization or institution, public or private, with one or more campuses in the same city)
	Medical	Small healthcare network
5 Contact Publisher	Government or Non-profit	Regional government agency or ministry, private, non-profit research organization or healthcare network
	Corporate	Single organization with regional campuses, not multi-national
	Academic	National or regional university system, consortia of academic libraries (includes groups of universities who share access or large state-wide licenses)
5 Contact Publisher	Medical	Large healthcare network, consortia of medical libraries and affiliated hospital (includes groups of medical libraries or hospitals engaging in shared access)
	Government or Non-profit	National government agency or large research institute using a shared network
	Corporate	Large organization or corporation with a domestic presence in several locations or an international presence in several countries
