

APS JOURNALS DIGITAL LIBRARY

a complete collection of multidisciplinary
physiology content at your fingertips

Empowering discovery to improve health
www.physiology.org

PHYSIOLOGY IS AT THE VERY BASIS OF MEDICINE

Physiology has been taught for over a century—it is the foundation upon which we build our knowledge of what “life” is, how to treat disease, and how to cope with stresses imposed upon our bodies. Physiology is at the very basis of medicine, translational medicine, systems biology, and bioengineering. As the practice of laboratory science and medicine becomes more interdisciplinary, identifying the foundation at the molecular and organ level becomes even more valuable.

The APS Journals Digital Library delivers online access to premier physiology journals that are uniquely and equally essential to fellows, medical students, and residents as well as scientists and clinicians with doctoral and other advanced degrees in the biological and physiological sciences.

WHAT'S INCLUDED

The APS Journals Digital Library is a single online package of 10 peer-reviewed original research journals and two review journals. The Digital Library is available at a significant discount off the individual title rates.

RATES

- Tier 1 \$7,680
- Tier 2 \$8,770
- Tier 3 \$9,610
- Tier 4 custom
- Tier 5 custom

Tier definitions can be found at www.the-aps.org/tiers.
For custom pricing, please contact subscriptions@the-aps.org.

DIGITAL LIBRARY HIGHLIGHTS

The APS journals are now hosted on Atypon's Literatum online platform which offers increased functionality and intuitive navigation for an exceptional online research experience. The Journals Digital Library includes the below features and benefits.

Access to a complete collection of multidisciplinary physiology content

A special section for librarians with important information and helpful resources, including access to real-time COUNTER compliant usage reports

Enhanced cross-platform search with filters for increased discoverability

More accessible linking to full-text content, with the option of a PDFPlus view

Altmetric Attention Scores for each article offering a glimpse at where and how often articles are being discussed in the news and social media

Immediate access to accepted papers via Articles in PresS, the APS "early view" service for all 10 original research journals

Personalized profile area for saving favorite journals, articles, and searches

Global distribution to reach the broadest readership

Continued indexing in Index Medicus, BIOSIS Previews, Scopus, Web of Science, and MEDLINE. Journal content is also accessible through PubMed

Perpetual electronic archiving/preservation in the LOCKSS and CLOCKSS systems
