Dear Colleagues,

I would like to personally invite you to the 21st annual Iowa Physiological Society (IPS) meeting to be held on Saturday, October 29th at Des Moines University. This meeting provides an excellent presentation opportunity for physiologists from multiple disciplines ranging from basic to applied research and molecular to systems physiology. Attending this event is a fantastic way to network and collaborate with other investigators in the region.

An exciting program is in place this year! We have a vibrant group of speakers doing cutting-edge work in their respective disciplines. A new student presentation format will be implemented that is fast-paced and allows for more oral presentation opportunities. We will have group activities in teaching and career development led by individuals with very striking and unique experiences and perspectives. Lastly, we have at least 6 cash awards (as much as $200 will be awarded) for student poster and oral presentations!

On behalf of the board, we encourage you to consider IPS as a regular presentation target for your work in the fall. There are many opportunities for students (grad and undergrad), postdocs, and faculty to present and become more involved with the chapter. We can proudly state that Iowa was the first chapter created and we have a dynamic group committed to maintaining it as a model chapter in the APS organization.

You can find out more information about the meeting and send your abstracts through the following website link; https://cme.dmu.edu/IPS2016

Sincerely,

James A. Lang, PhD 
President, Iowa Physiological Society
