

Renal Section Awards

The Renal Section selected winners for the Excellence in Renal Research Award at the 1990 APS/FASEB spring meeting, in Washington, DC. The winners in the pre-doctoral category were: **J. Michael Gonzalez-Campoy** for his study of the effect of low dose infusions of prostaglandins PGI₂ and PGE₂ during changes in renal perfusion pressure. He performed this work with Franklyn G. Knox at the Mayo Clinic, Rochester, MN.

Shashank Desai for a study on the regulation of countercurrent multiplication of ammonium in the rat renal medulla. He was sponsored by Mark. A. Knepper at the Laboratory of Kidney and Electrolyte Metabolism, National Institutes of Health, Bethesda, MD.

The winners in the post-doctoral category were:

Christos Chatziantoniou for his report on the differences in renal vascular response to angiotensin II and thromboxane A₂ between young SHR and WKY rats. He performed his work in collaboration with William J. Arendshorst at the University of North Carolina at Chapel Hill, Department of Physiology, Chapel Hill, North Carolina.

Ming Jer Tang for his work on Na,K-ATPase beta mRNA that is preferentially stimulated by low K⁺ in cultured rat proximal tubules. His work was directed by Alicia McDonough, at the University of Southern California, Department of Physiology, 1333 San Pablo St., Los Angeles, California.

William B. Guggino, Chair
Selection Committee

Renal Section winners of the Excellence in Renal Research Award are (L-R) Sashank Desai, Christos Chatziantoniou, William Guggino, and Meng Ter Tang.

New Instructions for Making Committee Nominations

The Society's work gets done by its committees. Therefore, the "best" people should get appointed to committees. To help in this important task, Council solicits recommendations from the Committee on Committees (COC). The COC, in turn, each year asks *all* society members, councillors, and heads of sections, committees, and departments to nominate individuals to fill vacant committee slots. To facilitate their task, COC prepared, with Council's approval, a new Nomination form. The advantages of such a form are that each nomination will be submitted in a standardized format and contain the relevant information on which COC can base its selection when preparing a slate of candidates.

Nominations submitted by letter in 1989 will be retained for consideration in 1990. However, all new nominations (including self-nominations) are to be submitted on the new nomination form included on page 137 in this issue of *The Physiologist*. Use xerox copies for multiple nominations or obtain additional forms from the APS office in Bethesda. The COC will welcome your comments on this innovation.
