Marquette University Animal Physiologist Position 2019-2020

The Department of Biological Sciences at Marquette University is seeking to hire a tenure track assistant professor with expertise in the broadly defined field of animal physiology whose research uses a mixture of classic and modern approaches. Individuals specializing in neurophysiology, comparative/evolutionary physiology, ecological and environmental physiology, body weight and exercise physiology, cardiovascular physiology, microbiome and toxicology research are particularly encouraged to apply. The successful candidate is expected to establish a vigorous extramurally funded research program, to synergize with the existing research in the department, and to contribute to the undergraduate and PhD programs. Applicants must have a Ph.D. and a minimum of 3-years postdoctoral experience, with a demonstrated potential for high quality research and teaching excellence. We are especially interested in recruiting candidates who have the skill and commitment to fostering an inclusive, encouraging diversity environment. Detailed descriptions for this position and application instructions can be found at http://employment.marquette.edu/postings/12446.
