Position Title: Medical Educator  
Department: Biomedical Sciences  
Division: School of Medicine  
Job Vacancy: F20-066  
Work Location: Columbus, GA  
Job type: Full-time

The Mercer University School of Medicine is seeking highly qualified educators with broad training capable of teaching in an integrated medical school curriculum. Multiple, non-tenure track, 10-month appointments are available on the Columbus, Georgia campus. Teaching faculty will play a key role in the continued development of an integrated, cross-disciplinary curriculum that includes small and large group case-based and team-based learning. Successful candidates will have a strong record of scholarly activity, and evidence of medical or graduate teaching expertise in one or more of the following disciplines: Microbiology, Immunology, Cell Biology, Biochemistry, Histology, Genetics, Pharmacology, Neuroscience, Behavioral Science, Physiology and/or Anatomy. Applications for full-time and/or visiting faculty at the Assistant, Associate or Full Professor rank will be considered and are available immediately. For over thirty years, MUSM has focused on training medical students to fulfill MUSM’s mission of preparing healthcare professionals to meet the primary care and health care needs of rural and underserved Georgia residents and communities. Emphasizing interactive and problem-based teaching strategies, our student-centered faculty provides a conceptual and practical foundation that equips graduates to be discerning consumers and innovative producers of knowledge across a variety of medical and community settings, as well as academic institutions. Through teaching, scholarship, and service, students and faculty work closely to have local, regional, national, and international impact.

Candidates must hold a terminal degree (M.D., Ph.D.) from an accredited college/university in one or more of the following disciplines: Microbiology, Immunology, Cell Biology, Biochemistry, Histology, Genetics, Pharmacology, Neuroscience, Behavioral Science, Physiology and/or Anatomy.

The ideal candidate will have experience in health professions education and with innovative learning strategies including the ability to facilitate large and small interactive sessions is preferred. Applicants applying for Associate or Full Professor ranks should have a strong record of medical school teaching in large and small group settings.

Faculty members are expected to participate broadly across the curricula in both the medical and graduate programs, and engage in scholarship in areas of biomedical science, medical education, or community-oriented research. Applicants applying for Associate or Full Professor ranks should have a strong record of medical school teaching in large and small group settings.
