Postdoctoral Fellow
LSUHSC-Shreveport - Shreveport, LA, USA

Job Description:
An NIH postdoctoral position to study leukocyte-platelet-blood vessel crosstalk in Sickle Cell Disease is immediately available. The Stokes lab, in the Department of Molecular & Cellular Physiology, has a major interest in cerebrovascular diseases and inflammatory and thrombotic pathways intersect to impair vascular function. Applicants should have a Ph.D. and be a driven individual able to work independently. Applicants should also have a strong record of research productivity and have experience in cell culture and molecular techniques, as well as mouse surgical models. Please send your CV, letter of interest and contact information of at least 2 references.

Interested Candidates may send CV to:
