Opening of a Post-doctoral Position

Department of Physiology and Renal Research Institute at the New York Medical College are looking for a postdoctoral fellow to study endothelial glycocalyx in pathophysiological conditions. This position is supported by the NIH grant and is valid for four years (until 2024). The appointment requires solid knowledge of protein purification and basic skills in investigations of microcirculation using laser-Doppler flowmetry, intravital fluorescence videomicroscopy, small animal surgery, biochemical techniques, immunohistochemistry and electron microscopy. Starting salary is $40,000. Interested persons should send their letters and CVs to michael_goligorsky@nymc.edu or dong_sun@nymc.edu.
